

NEWS RELEASE

ALPINE'S INTELLIVIEW 18.02.00 SOFTWARE SUITE ACCELERATES THE TRUSS DESIGN PROCESS

December 7, 2018, Glenview, IL. – Alpine announces the availability of IntelliVIEW software suite version 18.02.00, highlighting new designer efficiency tools and competitive engineering features, building on a history of engineering excellence in the industry's most powerful component design and management software.

"Building on Alpine's 'Connecting for the Future' theme, Alpine is committed to providing the best designer experience and the most complete set of tools for our customers. The IntelliVIEW 18.02.00 release delivers on that commitment," said Rick Tilelli Director of Software Engineering for Alpine.

Positive Customer Impact

The features and functionality in Alpine's IntelliVIEW 18.02.00 continue the tradition of accelerating the design process with new designer efficiency tools. New tools are available for both wall and truss design. They provide easy input for walls and simplify adjustments throughout the process. Enhanced designer control and additional optimization tools result in production and installation efficiency gains.

Building on the excellence in competitive engineering provided by the IntelliVIEW software suit, the 18.02.00 release empowers truss designers with the ability to choose special options. The designer is given the ability to add supplemental plates, specify treated lumber options for exposed areas of a truss and to disable relative deflection checks when code allows.

Alpine is committed to connecting with customers, creating partnerships and developing products that simplify the future. The new features released in IntelliVIEW 18.02.00 respond to customer pain points. The IntelliVIEW 18.02.00 software update is available for immediate download. Additional release information is available by contacting Alpine customer service and support teams or by viewing the 18.02.00 literature at:

About Alpine

Recognized for its engineering excellence, productivity-enhancing software, equipment solutions, and the industry's best service, Alpine is a leading provider of building component software, metal connector products and equipment to component manufacturers. Since 1966, the company has partnered closely with customers to enhance their business and productivity. Alpine is also a leader in delivering software solutions that increase homebuilder productivity and profitability. The company is a division of Illinois Tool Works Inc., a Fortune 200 global diversified manufacturer. For additional information, visit www.alpineitw.com.
