

Fast. Safe. Reliable.

Auto**MAKS**

- Intuitive controls
- Self-diagnostics
- Cleaner Air
- Energy efficient
- Easy Printing

Change your cutting operation

Alpine introduces a revolution in component saw design. The Alpine AutoMAKS is the latest addition to Alpine's legendary saw family and is the fastest, safest and most reliable component saw available.

The AutoMAKS is the fastest saw in the market, moving boards through the machine as quickly as 2 per second. Using servo technology, this saw will set up 25 percent faster than other saws. An automatic infeed means a board will be placed in every dog, increasing efficiency.

Safety is foremost in the design of the AutoMAKS. A cover keeps sawdust contained to the saw area and the cover shields workers from

the blades. The sawyer operates the saw at the front of the infeed, preventing bending and straining and keeping hands away from the moving parts.

Like its predecessors, the AutoMAKS features five blades to maximize the saw's cutting range and throughput. It utilizes servo drives and absolute encoders for exact movement and positioning.

The advanced electronics contain diagnostic abilities that pinpoint a failing part and provide instructions for fixing or replacing the part, minimizing downtime

The AutoMAKS will change your perception of component saws.

Alpine AutoMAKS Component Saw

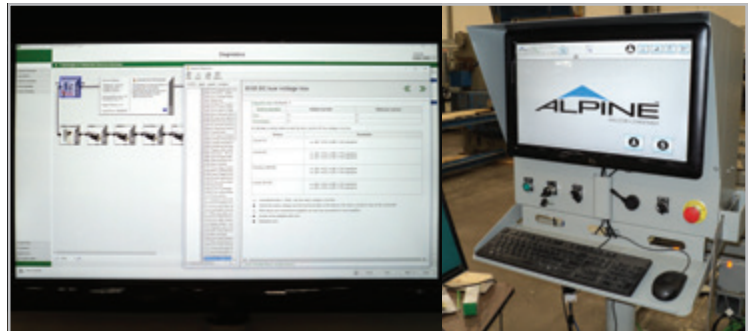

AutoMAKS

Specifications

- 5 heads, each with a carbide tipped blade
- Cover to contain dust
- Belt conveyor to remove scrap
- Speeds up to 120 boards per minute
- Tri-lingual interface
- Self-diagnostics with instructions
- Cuts 4"x2" and 2"x3" – 2"x12" lumber
- Data capture through eShop compatibility

MAKSimum Dust Control – The unique cover on the AutoMAKS controls dust, keeping it out of the air and making cleanup easier.

MAKSimum Productivity – Schneider advanced diagnostics screens guide maintenance. New Alpine software simplifies operation.

MAKSimize safety – Operation takes place away from blades and moving parts. Auto infeed eliminates operator bending and straining.

MAKSimize speed – AutoMAKS has the fastest set up speed in the market. Up to 120 boards per minute can run through the saw and every dog is automatically fed.
