### **ALPINE INTRODUCES ALS 4.0 SMALL PARTS CONVEYOR**

**VERNON HILLS, Ill., June 13, 2016** – Alpine has introduced an innovative new small parts conveyor for the ALS 4.0 Linear Saw that is designed to enhance customer productivity by improving efficiency and material flow. It operates by delivering useful small parts one-by-one from the saw exit to a convenient pickup location.

The conveyor not only reduces time and effort collecting small parts, but minimizes the potential for accidents. It increases safety by eliminating the need for employees to retrieve small parts near the saw while also preventing accidental bumping of the Estop button.

The ALS 4.0 Small Parts Conveyor is available for both left-hand and right-hand machine configurations, depending on the ALS 4.0 small parts exit location. An accompanying installation and maintenance manual is also provided.
