NEW STH STRAP HANGER SERIES FROM ALPINE PROVIDES OUTSTANDING JOBSITE PERFORMANCE AND VERSATILITY

VERNON HILLS, Ill., June 16, 2015 – The new STH Adjustable Strap Hanger Series from Alpine features 17 easy-to-install products that provide unparalleled performance and versatility on the jobsite. They are engineered to maximize productivity by speeding and simplifying the installation process in a wide range of construction applications.

Offering outstanding durability and value, these hangers provide higher load-carrying capacities for all lumber species and load duration factors than comparable products. In addition, their innovative design requires the use of fewer nails, which helps speed product installation. The hangers also can be conveniently field-formed to facilitate top flange installation.

“We are pleased to introduce this new family of strap hangers, which extends our high-performance construction hardware product portfolio,” said Pat Ryan, Alpine sales and marketing manager – Construction Hardware. “All 17 products were designed and manufactured to Alpine’s exacting standards, which should enable them to provide many years of excellent service in the field.”

NEW STH STRAP HANGER SERIES / PAGE 2

The STH Adjustable Strap Hanger Series can be installed via multiple methods, including top flange and face mounting.

Designed, engineered and manufactured by Alpine, the hangers are made from high-strength, mill-certified steel. They are backed by nearly 50 years of engineering excellence and experience.

All of the hangers in the new STS Adjustable Strap Hanger Series carry IAPMO (ER_0179) and FBC (FL 14079-R4) engineering approvals. The products are available for use throughout the U.S.

Recognized for its engineering excellence, productivity-enhancing software and equipment solutions, and the industry's best service, Alpine is a leading provider of building component software, metal connector products and equipment to component manufacturers. Since 1966, the company has partnered closely with customers to enhance their business and productivity. Alpine is also a leader in delivering software solutions that increase homebuilder productivity and profitability. The company is a division of Illinois Tool Works Inc., a Fortune 200 global diversified manufacturer with \$14.5 billion in revenue in 2014. For additional information, visit alpineitw.com.
