

**Alpine to Feature New Website for VisionREZ™ Software at 2017
International Builders Show**

Exhibit to Showcase Solutions from Conception Through Construction

Glenview, IL. – January 03, 2017 — Alpine, a leading provider of products and services for the building components industry, will feature its redesigned website for the VisionREZ™ software at the International Builders Show (IBS) Jan. 10-12, in Orlando, Fla.

Alpine’s exhibit at IBS (Booth W6789) will be presented in collaboration with Paslode, manufacturer of fastening solutions. By building together, the two providers will focus on driving productivity through the entire building process – from conception through construction.

“We have received great feedback from our customers about the new website and are looking forward to sharing the new user experience with builders at IBS,” said Michael Schwitter, Business Manager for VisionREZ. “The latest version of VisionREZ will help builders simplify the residential construction design process by using the Autodesk Revit® platform to improve efficiencies and save costs.”

VisionREZ™ is a residential Building Information Modeling (BIM) technology that allows for the sharing of all information related to a project in a single and accessible model. The new website has added features to direct users quickly to their specific areas of interest, and help them stay informed with the latest industry news.

The IBS booth will offer three different stations with AEC Technicians showing various aspects of the VisionREZ™ software. Improved Architectural functionality, Structural Framing and the latest version of Options Manager will all be prominently featured.

For more information on the VisionREZ™ software and website, [visit www.visionrez.com](http://www.visionrez.com).

About VisionREZ

VisionREZ is a BIM-based technology that integrates information and functions through a single interchangeable file format utilized by the entire supply chain. VisionREZ software enables users to streamline work processes, deliver more accurate documents and produce higher-

quality designs. Schedules populate bill of material listings to aid cost estimates, which 3D models are shared collaboratively with manufacturing solutions to increase efficiency and reduce waste. From concept to production, VisionREZ is designed to help users work the way they build. For additional information, please visit www.visionrez.com.

About Alpine

Alpine is a leader in supplying the building components industry with the most comprehensive line of technology-driven products and services for a wide range of building component needs — from engineering and design software to production equipment and construction hardware, plus the innovative TrusSteel cold-formed steel truss system. Since 1966, the company has partnered closely with customers to enhance their business and productivity. Alpine is part of the Residential Construction (North America) Division of Illinois Tool Works Inc.
