

# IntelliVIEW® Suite

Max production. Quote to ship.

## See. Build. Manage. All according to plan.

IntelliVIEW® is a fully integrated software suite for the design and layout of a building's framing components, including roof and floor trusses, wall panels, solid sawn, Engineered Wood Products (EWP), construction hardware, sheathing, and ancillary products.

Get the industry's most complete design analysis, cost information, and bill of materials to increase your profits by reducing plate and lumber use.

Automatically add optimized designs to the Component Catalog for use in future jobs. Easily search the truss catalog, review matches, and automatically load them to the job to save time and simplify workload.

Customize database screens to make sharing and tracking information easy. Make changes anywhere in the software suite with real-time updates. More control means more throughput and higher productivity across the plant.

## IntelliVIEW Suite Apps

### iCommand®

Manage projects, customers, materials, and pricing.

### iModel

Design truss layouts and profiles.

### iPanel

Design wall layouts, panelize, break, stack, and build.

### iDesign

Optimize material usage and engineer trusses.

### iSource

Manage material use and inventory.

# Make your business more competitive and profitable with the IntelliVIEW® Suite.

## Maximize Designer Efficiency

Frame projects faster with flexible conditions and intuitive workflows.

## Reduce Material Costs

Engineer trusses while minimizing lumber and plate costs. Track all pieces, plates, and labor for bidding and invoicing with the software's integrated platform.

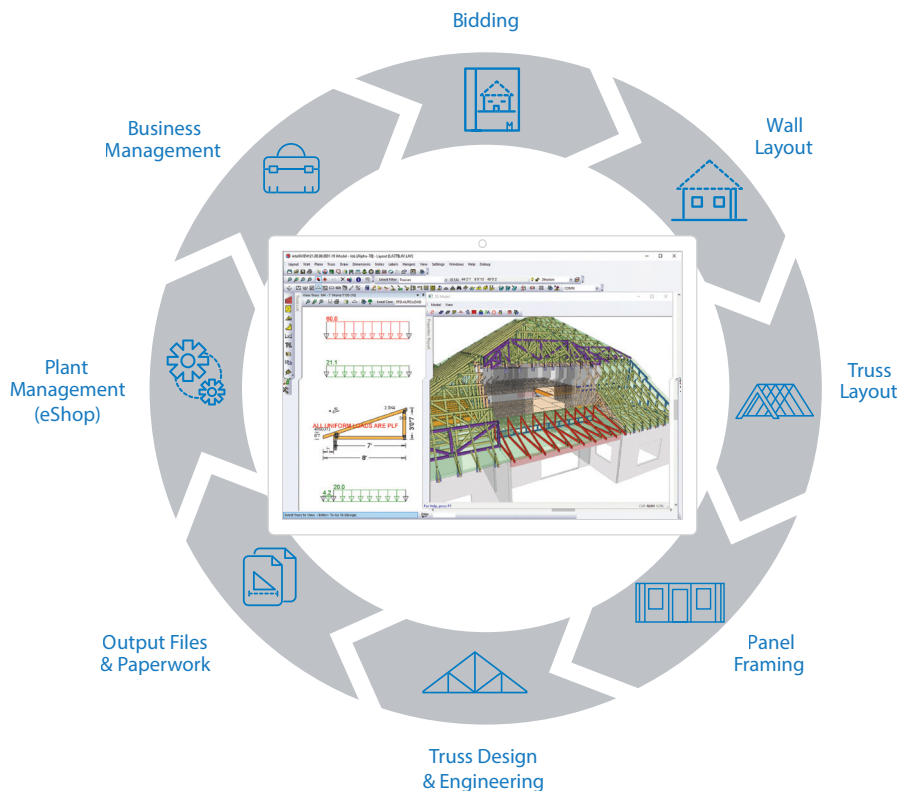

## Streamline Your Quote

IntelliVIEW Suite with STITCHER® drastically reduces wall and opening input time up to 75%, making bidding and design more efficient.

## Built-in Continuous Improvement

Alpine® is dedicated to delivering the most competitive software offering for component manufacturers, constantly striving to improve the IntelliVIEW® Suite.

## The entire design process – full circle.

## NEW 21.02 FEATURES

### CAD Tools

Improved modification, labeling, and dimensional tools.

### Walls & Bearing Legends

Automatic legend note with customization for unique bearing heights.

### Enhanced 3D Viewer

Improved graphics, performance, and ability to share a 3D Model with customers on the Alpine Portal.

### Truss Collision Tool

Automatically identifies duplication or overlapping trusses in layouts.

### Simplified Truss Editor

Save CAD markups to your truss files from iModel.

### iModel 3D Room Openings

Quick and accurate definition of 3D room openings (e.g., attic rooms and forced air units).

### Floor Truss Bearings

Improved mid-height bearing design with ribbon notch.

### Truss Properties Manager

Find, review, and compare trusses in layouts.
